

The apartments

The apartments are designed to accommodate people with a range of lifestyle, health and other needs with the aim of promoting long term independence and ageing in place.

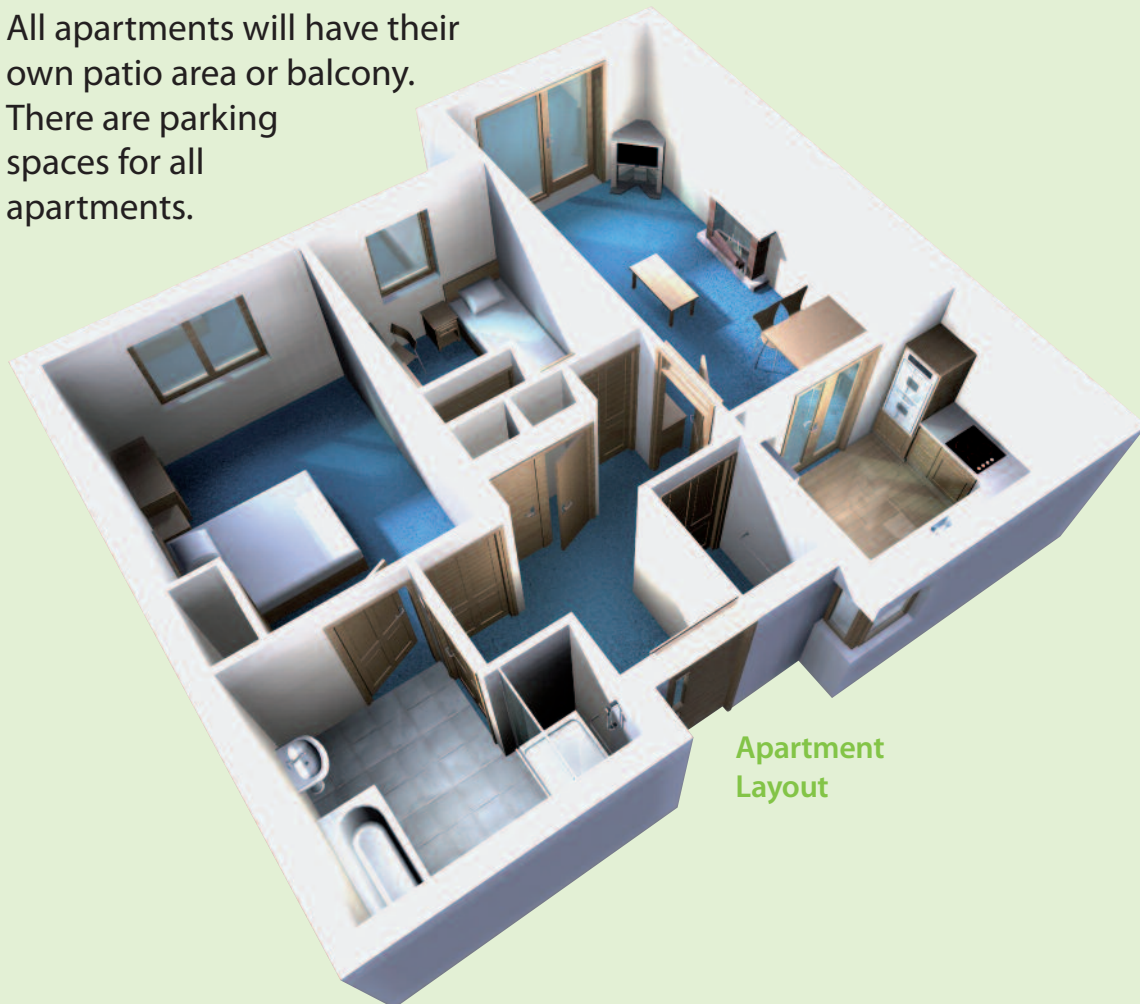

Each apartment is fitted with a camera entry system (linked to your own TV so you can see who is at the main secure entrance), smoke alarms and will be connected to the community alarm service, providing you with security and peace of mind, ensuring you can summon help when you need it.

All the apartments have two telephone points and residents will be responsible for their own call costs. Residents will be liable for the payment of their own council tax.

These apartments are designed to ensure energy efficiency and lower running costs. They will also be built to Lifetime Home standards.

All apartments will have their own patio area or balcony. There are parking spaces for all apartments.
