

## Vision for community living

A balanced community for the over 60's, to form part of an existing neighbourhood, suitable for both independent, fit able bodied residents as well as being sympathetically designed to meet the needs and aspirations of less able residents.

A range of financial terms providing affordable options to all.

An opportunity for residents to pursue existing and new interests and build new friendships.

*'A place where all are made welcome.'*

## Service tailored for you

We will promote a personalised range of services, reflecting each of your individual needs, both when you move in and as they change over time. We intend to promote links with other health care agencies so help will be at hand if required.

There will be a concierge service of dedicated staff on site to provide advice and assistance, to answer your day to day queries and to keep an eye on your apartment when you are away.
